

TONER TIPS

How to change toner on
Kyocera MZ Nova Series

1. Open cover to reveal the empty toner

2. Locate the empty toner with its door already open (only completely empty toner bottles will be unlocked)

3. Pull out the toner bottle and replace with a new bottle (black tab facing down)

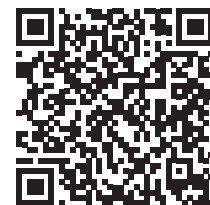

4. Shut all the doors and close the cover (process is the same for all toner colors: yellow, magenta, cyan, black)

IMPORTANT NOTES

1. The Nova Dual Toner System allows the device to continue printing DURING toner replacement.
2. Empty toner bottles are #2 recyclable.
3. Toner doors are locked to protect against wasted toner.
4. You do not replace both of the same color bottles at once. You only replace the toner with the open door.

SCAN FOR VIDEO

All toner bottles should enter the machine as smoothly as they come out. Incorrectly inserted toner can cause severe damage to your machine!
