

Kyocera Cloud Print and Scan

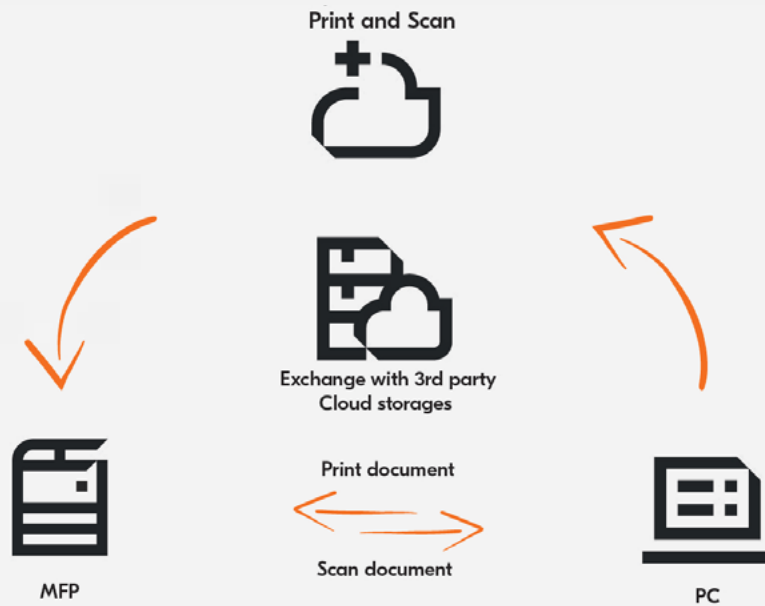

Manage print environment costs and maintain the security of released jobs with our native SaaS solution.

Kyocera Cloud Print and Scan

Kyocera introduces our new native Cloud print management tool built on our Cloud platform technology that allows you to optimize your company's printing costs. Kyocera Cloud Print and Scan (KCPS) increases the flexibility and features of your print environment and removes the costs of on-site servers by managing your Kyocera devices in the Cloud.

By moving your print server to the Cloud, you reduce the costs associated with having an on-premise server while also providing your businesses with the perfect solution when it comes to increased document security and management of print costs. KCPS also reduces your operational costs by using a high-class, multi-tenant architecture hosted in the Cloud with Amazon Web Services (AWS). Thanks to the embedded Print&Follow™ function, the documents sent to the MFP will remain in the system and can be securely printed from any device at any time. Full functionality of the Kyocera KX Driver is supported.

Your potential business challenges

- 
Cost - My current on-premise print management solution involves high infrastructure and operational costs.
- 
Security - Moving my business to the cloud could be potentially harmed by the theft of confidential data.
- 
Inefficiency - If my document storage is in the Cloud, there won't be easy accessibility for employees.
- 
Sustainability - To ensure that my business meets its sustainability goals, I will always be looking for new methods to reduce CO2 emissions.

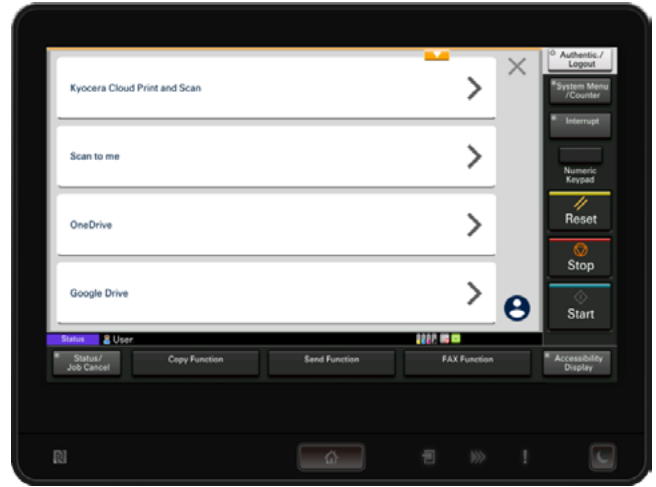

Kyocera offered solutions

- 
Cost Reduction - By using KCPS, you are only paying for the service (SaaS) and no other initial investment is needed.
- 
Enhanced security - Using the Client Spooling function, the print jobs can stay within the customer's network and can be released from any device - only the metadata will be stored in the Cloud.
- 
Improved productivity - With KCPS, you can scan directly to your cloud with the touch of a button.
- 
Minimized waste - Centralized and consolidated hosting services leads to a reduced carbon footprint that is generated by your company.

Kyocera offered solutions

Create policies and allocate them to different user groups to reduce print cost in your business. For example, within your organization, establish default settings such as black and white only for Finance and color print for Marketing. Moreover, quotas can be implemented in order to have optimal cost management for a group of employees, for a specific department or considering the organization as a whole.

Printing and scanning functions are intuitive and easy to use from KCPS terminal, which is optimally integrated on Kyocera HyPAS devices. At the same time, secure authentication is possible by login using ID card, PIN code, or user name and password.

Key Features & Specifications

Print Quota - Assign and manage print quotas to a group of users in order to reduce your total print cost.

Local spooling - The job can be released from any Kyocera HyPAS device within the customer network.

Multiple scan options - Scan documents to users' email and to KCPS server in the cloud.

Multi-tenant software - Reduce your operational costs using the multi-tenant software hosted in the cloud with Amazon Web Services (AWS).

Print policies - Assign the desired print policies to a group of users in order to improve their print behavior and optimize print cost management.

System Requirements - Client Operating System: Windows 8 or later, MacOS 10.13 or later, Browser support: Chrome, Safari & Edge

Security - Job release only after user authentication with ID card, PIN code, or user name and password.

Actionable Reporting - Variety of reports guiding you to take the right decision in managing your business.

Chromebook support - Download the "Cloud Print and Scan Chrome Extension" on the Google Chrome Web Store to print from your Chromebook. Users can log in to KCPS from their Chromebook and spool print jobs directly to KCPS.

3rd party Cloud storage integration - Print from, scan to, and forward faxes to connected 3rd party cloud storage: Microsoft OneDrive™, Google Drive™, Box.com™, and Box Enterprise.

Copy Function - The users can benefit from the copy function of the device, and this will still be counted within their print quota (the user stays within their print limit).

Kyocera Document Solutions has championed innovative technology since 1934. We enable our customers to turn information into knowledge, excel at learning and surpass others. With professional expertise and a culture of empathetic partnership, we help organizations put knowledge to work to drive change.
